***** VERY IMPORTANT*****

The Principal will consider this request, but must also strive to balance classrooms academically, socially, and behaviorally. Students who receive special education or academic intervention in reading or math will be placed in classrooms that facilitate access to their services. Again, requests will be considered, but due to the needs of all children, there is no guarantee that they can be honored. We appreciate your input and any additional comments listed will help us to best meet the specific needs of your child.
